Herrick Bridge Renovation

Beginning in July 2021 through 2022, Herrick Bridge will undergo scheduled renovation. Specific impacts will be published as they become known. Plan for delays and exercise additional caution in the area.

• To prepare for the work (beginning **July 6**), signage will direct cyclists to utilize the eastern route (along Cannon Dr.) of the Olentangy Greenway Trail between the Drake Center and SR-315.
• Once roadway construction begins (**appx. mid July**), two-way traffic will be maintained over the bridge, with one lane in each direction. The sidewalk will close, with signage detouring pedestrians to the pedestrian bridge by the Drake Center. Additionally, the existing impact on Herrick Dr. will extend from the Goss Lab entrance to Olentangy River Rd.
