

Why Should I Use PPE?

Eye Protection

Protects from flying particles; contact with chemicals; fluid under pressure

Head Protection

Protects head from impacts

Hearing Protection

Protects from excessive noise

Respiratory Protection

Prevents inhalation of potentially hazardous substances such as dust or chemical vapors

Body Protection

Protects from temperature extremes; hot splashes; potential impacts; hazardous materials

Hand Protection

Prevents cuts; slivers/punctures; chemical exposures; heat/cold; electricity; biological hazards

Fall Protection

Use whenever working at a height of 4 feet or above

Foot Protection

Protects from impact from falling or rolling objects; punctures from stepping on sharp objects; electricity; slippery or uneven surfaces
