EXECUTIVE SUMMARY

HISTORY AND PURPOSE
The Ohio State University Signage Standards (OSU USS or USS) represents the culmination of an effort to design a comprehensive signage and wayfinding system and is published as the first implementation projects are underway. This is a living document that will evolve as we learn from implementation, as the needs of the university change, and as governing regulations and statues that affect signage are revised.

The primary purpose of most of the signage outlined in this document is to create a system to convey information. The primary audience of this system is first-time and infrequent visitors. The primary purpose of this document is to outline a consistent, uniform signage and wayfinding system applicable to The Ohio State University Columbus campus. The signage system includes some specialty signage for the purposes of recognition, interpretation, and marketing. Thus, primary vehicular and pedestrian informational signage should not be relied upon for branding and marketing.

In spring 2013, the university finalized its visual identity guidelines. The intention of this document is to align all signage with those guidelines, but this alignment is a work in progress because of the timing of the public release of the visual identity guidelines.

The Ohio State University has four regional campuses, each with a co-located, separate institution. These co-located institutions have unique visual identity guidelines distinct from Ohio State. Thus, signage for these campuses will be adapted from the OSU USS as needed.

SCOPE
The USS applies to all signage and information transfer systems on campus, including interior, exterior, permanent, and temporary, but excluding audible communication, TDDs, oral communication, and sign language communication.

CONTENT
The University Signage Standards includes:

1. References to university policies and procedures describing responsibility, authority, and processes for requesting all signage on campus.
2. A section outlining the standards for each type of sign in the current sign family. This section will be updated as warranted to address new signage and wayfinding needs as they are identified.

The Introduction outlines processes for requesting signage, requesting assistance with or seeking approval of signage and graphics proposals, seeking approval for variances to existing sign standards and/or types of signage not specifically covered by these guidelines. This section also outlines procedures for updating, proposing, and making amendments to this document.

The System Standards section provides specific information about the purpose, location, and content of each sign type and contains design specifications for signage materials, structure, size, font size, typeface, standard symbols, colors, and any accessories. New sign types that have been recommended are identified as “to be developed” sign types and will be progressively developed by the University Signage Coordinator in consultation with the Signage Committee.

A Glossary of Terms explains the meaning of the terms used in the USS.
INTRODUCTION

BACKGROUND

One of the key principles of the One Ohio State Framework Plan is to make the campus navigable with a restored street network and dynamic wayfinding. To implement this principle, the university allocated funding to develop a comprehensive wayfinding plan and to implement a number of pilot projects. As part of this plan, this document was developed to support the initial investment in signage. The first step in this process was to review and update the university's current signage policy, procedures and guidelines. The USS was developed to incorporate new signage types designed as part of the wayfinding plan, and to clarify and strengthen the approval process and signage standards. The USS will be reviewed and updated by the University Signage Coordinator with input from the Signage Committee annually or as updates are needed.

Please contact the University Signage Coordinator (see the Contacts section) with questions or recommendations for manual content.

PURPOSE AND SCOPE

The Ohio State University has more than 6 million visitors annually. Our visitors are a diverse group and many are unfamiliar with the Columbus area and the Ohio State Campus. Visitors to our medical campus may be under additional stress because of illness or concern over the health of their family members.

The primary purpose of wayfinding signage is to provide clear, legible and understandable directional information to campus visitors. The primary audience is the first time and occasional visitor. The University Signage Standards (USS) was created to provide a consistent and uniform signage and wayfinding system applicable to the OSU Columbus campus, and adaptable to the regional campuses.

The scope of this USS includes all passive and electronic signage systems. For terms and definitions please refer to the Glossary of Terms section of this manual.

Signage and graphics are defined as:

- Any object that reflects association with the university and is designed to be seen from a public area or within a university facility.
- Any object placed within a public area, on or within a university facility that is intended to communicate information, identification, or direction through the use of letters, words, numbers, symbols, pictures, or patterns.

OSU Purchasing categorizes signage as a “Special Approval Spend Category,” referenced in the Purchasing Policy. A direct purchase order cannot be issued to a department for signage. Instead, a requisition must be entered that will workflow to the Purchasing Department for approval by the University Signage Coordinator.

All new signage shall comply with the guidelines set forth in the USS. All university signage must conform with the design, size, material, content, format, symbols, type style, and color standards outlined in this document.

This document will incorporate all university signage, including types unique to other units such as Facilities Operations and Development, Wexner Medical Center (WMC), Student Life, Athletics, and Transportation and Traffic Management (TTM), etc. Thus, all university units shall conform with this standard.

To accomplish consistency, all signage that does not currently conform with the USS shall, as new construction, space renovations, and open space improvements occur, be progressively replaced with new compliant signage, or modified to be compliant.

AUTHORITY

All signage or graphics projects, without exception, will be reviewed for conformance with Campus Signage and Graphics Policy. No signage design or implementation shall be completed without approval as outlined herein.

Currently, all WMC interior signage and graphics are reviewed and approved by WMC Wayfinding and Signage Manager and all other university signage and graphics are reviewed and approved by The University Signage Coordinator. In the near future, these two entities will be integrated. All signage or graphics projects, without exception, must be reviewed and approved by one of these individuals.

1. All signage and graphics on campus will conform to the USS.
2. Signage and graphics will conform to the graphics code and/or regulations of the appropriate jurisdiction.
3. Signage and graphics other than vehicular wayfinding signage will not be located in a public right-of-way.
4. No permanent or temporary sign or graphic will be erected or installed in public areas on university property without the prior written approval of the University Signage Coordinator or the WMC Wayfinding and Signage Manager.
5. All signage and graphics erected without appropriate review and approval are subject to removal or modification at the direction of the University Signage Coordinator or WMC Wayfinding and Signage Manager.

CRITERIA FOR DEVELOPING STANDARDS
Several criteria were used in developing the signage family and standards for each type of sign, including the design, material and construction specifications of the signs. While these standards provide a broad range of signage to cover the most common needs for signage on campus, they cannot be all-inclusive. There will be a need for modifications and additions to the sign types in these standards. If requests for signage for a certain purpose or certain modifications become common, the University Signage Coordinator will consider modifying the standards. All requests for additional signage types or variations on the requirements contained in these standards should be addressed to the University Signage Coordinator. The criteria outlined below will be significant considerations in the evaluation of modifications, variations and additions to the sign types.

Design Criteria - Simplicity and legibility are primary design criteria for effective wayfinding signage. Simplicity includes the use of common, shortened version of names, consistent terminology, internationally recognized symbols, and limiting the number of messages on a sign. Legibility includes the use of fonts at adequate size, colors with appropriate levels of contrast and limiting the amount of information appropriate to the speed and viewing time of the user of the sign. Thus, vehicular signage will require larger letters, more space around the lettering, and less information to be legible, particularly on higher speed roads. Pedestrian signage can use smaller type sizes, and can contain more information, as it can be viewed in a more leisurely fashion, but information is still limited by human ability to comprehend and remember.

Consistency of color and appearance are important factors in developing a cohesive system, and will contribute to the recognition of the system as belonging to Ohio State, but branding and marketing are secondary considerations to informational effectiveness for signage.

The signage system includes signage types for special purposes including recognition, interpretation, education, promotion and retail signage. Primary vehicular, pedestrian, parking garage and building identification signage should not be used for these purposes.

Hierarchy of Information - The signage and wayfinding system depends on a hierarchy of information that delivers information in a logical sequence at an increasing level of detail as visitors move from the regional highway system, to the city and campus street system, park their cars or bikes or exist a transit vehicle and access their destination on foot or with a mobility device. The hierarchy of information developed for this system was based on data collected on visitor counts for major destinations on campus.

At the highest level the freeway signage has been modified to direct visitors to SR 315. The campus has been divided into three “zones” – Academic Campus, Medical Campus and Athletic Facilities. Signage on SR 315 reflects these three zones, and vehicular and pedestrian wayfinding signage also reflect the zoning concept. The destination hierarchy for signage is outlined in the chart on the next page.

Compatibility with Code Requirements - All signage must meet rules and regulations set forth by this university, ADAAG, Public Safety, and any other state, city, and local codes, regulations, and statutes.

Durability and Maintenance - The materials and construction specifications contained in this document are intended to ensure that signage and graphics are to be durable, resilient, easily maintained and resistant to normal deterioration and acts of vandalism.

Availability - The signage standards contained in this document are intended to be bid and fabricated by multiple manufacturers, with replacement components readily available in the market. The ability to obtain competitive pricing from multiple vendors will be a significant consideration in the evaluation of modifications, variations and additions to the sign types.
INTRODUCTION

STANDARDS
Glossary of Terms

**ADA** The Americans with Disabilities Act, which includes architectural or building design guidelines aimed at improving accessibility in the built environment. All signage on campus must comply with these guidelines.

**Adjusted letterform** A wordmark or primarily text element that has been transformed or modified and cannot be typeset. May combine text and simple graphics such as a line or shape.

**Arrow** Symbol representing movement or direction.

**Audible Communication** Information perceived through hearing.

**Braille** Method of writing works by means of dots for the use of sight impaired; each cell is an arrangement of dots within a six dot matrix and represents a sound or word.

**Cap Height** Vertical distance occupied by a capital or upper-case letter.

**Capital Letters** Upper-case letters, as distance from lower-case.

**Center** To position a word or symbol in the lateral middle of the viewing area, as distance from either flush right or flush left.

**Commemorative (signage or naming)** Recognizes contributions of financial resources or goods and services to the university.

**Environmental Graphics Communication** A form of information transfer that is graphic in nature, as opposed to audible.

**Flush (left or right)** A typesetting term to indicate no indentation from the margin, type or symbols aligned at the right or left margin.

**FITS** Abbreviation or acronym for Facilities Information and Technology Services at The Ohio State University Wexner Medical Center.

**Gloss** Sheen reflected off a surface measured from matte (no sheen) to super gloss (very shiny).

**Graphics** Any object that reflects an association with the university and is designed to be seen from a public area or within a university facility.

**Heads up (Map orientation)** Maps placed according to their location in space, or oriented in the direction the viewer is facing, rather than north-south.

**Honorific (signage or naming)** Recognizes significant non-monetary contributions or service to the university.

**Hierarchy (of information or destination)** A graded or ranked system of presenting information delivered in a logical sequence. For signage, progressively more detailed information is presented as one nears the destination, with the highest level of detail provided inside the facility.

**Inter-letter spacing** Lateral or horizontal space between letters, determined optically.

**Inter-line spacing** Vertical space between lines, determined mechanically.

**Inter-word spacing** Lateral or horizontal space between words, equivalent to lower-case “r”.

**Layout** The result of determining whether text and symbols are centered or flush.

**Legibility** The ease with which a displayed message can be seen or discerned.

**Letter style** Form that a letter takes in a given design or typeface, as identified by names such as Buckeye Sans, Arial, Capita, Times, etc. Letter styles are also classified as serif (Capita or Times Roman) vs. san serif (Buckeye Sans or Arial).

**Lowercase** Letters that are not upper-case or capital.

**Non-Verbal Communication** Communication which relies on symbols or pictures, rather than words, for meaning.

**Oral** Spoken, audible.

**Orientation** Location or position relative to the points of the compass or other specific direction. The adjustment or alignment of oneself to surroundings.

**Pictograph** Symbol incorporated into as sign.

**Readability** Ability to be seen and perceived. Legibility.

**San Serif** Letter forms or typefaces without as serif, such as Buckeye Sans and Arial.
INTRODUCTION

STANDARDS

Glossary of Terms

Serif Short cross lines at the ends of letters classified in this way as distinct from san serif. Typefaces or letter forms such as Buckeye Serif and Times Roman are serif fonts.

Set Upper or lower case.

Sign Visual or tactile element utilized to communicate a message through typography, symbols and pictograms.

Sign Face Reading area of a sign on which text and symbols are displayed.

Signage Any object placed within a public area or within a university facility that is intended to convey information, identification or direction through the use of letters, words, numbers, symbols, pictures or patterns.

Signage Committee Ad-hoc committee which supports the University Signage Coordinator and the WMC Wayfinding and Signage Manager (see Contacts page) in the review and approval of signage as needed.

Standard Establish mandatory expectations and may be set by responsible offices and others. Governing document used as the approved model or to state the baseline required in practice at Ohio State. Are usually developed in accordance with published federal, state, or industry regulations, requirements, or standards. A standard or requirement may apply university wide or to a particular unit or units.

SPG abbreviation or acronym for this document, Signage Policy and Guidelines. xx

Symbol Pictograph, pictorial representation, used in signs. Symbols are a non-verbal means of conveying information.

Policy Set of criteria to guide decisions on selection of appropriate sign types and to identify authority and responsibility for such decisions.

Tactile Signs Information perceived through the sense of touch. Tactile signs have raised letters, symbols or braille which can be interpreted by tracing with fingers over the surface.

Typeface, Typography Letter form or font.

Uppercase Capital letters.

Verbal Communication using words; distinct from non-verbal (communication using symbols or pictures); distinct from oral, which is audible.

Visual Communication Information perceived through the sense of sight.

Wayfinding Finding one’s way to a destination; spatial problem solving comprising three independent processes; information processing, decision making, and decision execution.

WMC Abbreviation/acronym for The Ohio State University Wexner Medical Center.

Wordmark A distinct, typographic treatment of the name of a company, institution, or product name used for purposes of identification and branding. Wordmarks are primarily text, but may include simple shapes or lines that are secondary to the name.

Zone A smaller region of a larger geographical area. For The Ohio State University campus three zones have been developed: Academic Campus, Athletic Facilities, and Medical Campus.

ACADEMIC BUILDINGS

All requests for signage and graphics not associated with WMC are required to submit a Signage Request Form through FOD at [https://fod.osu.edu/make-request#signage](https://fod.osu.edu/make-request#signage). The request will be forwarded to FOD for processing.

All signage requests will go through the process outlined below.

1. The University Signage Coordinator will verify the signage request and meet with the customer as necessary to assess the request and establish the appropriate solution for the signage need(s).
2. If an appropriate standard sign type is available, the University Signage Coordinator will select the applicable sign, obtain a price quote and enter an eRequest from the signage vendor.
3. If an appropriate sign is not available in the standard signage library, the University Signage Coordinator will work with the customer to develop designs and documentation, and request a price quote from the vendor. If the sign is for a construction project, the University Signage Coordinator will work with the Project Manager to develop the appropriate sign package.
4. University Signage Coordinator will prepare the sign quote and submit the requisition for approval.
5. Upon customers fiscal approval, standard interior signs are provided / installed by UniPrint. All custom signs orders will be provided / installed through the requested vendor.

All signage orders placed outside of this process may encounter delays in the review and approval process or be denied.
WEXNER MEDICAL CENTER
To request a sign in a WMC building, submit a signage request through Eservices at https://osumc.service-now.com/. The request will be forwarded to the WMC Facility Planning (FP) group for processing. All WMC signage requests will go through the process outlined below. The customer will be notified through Eservices at the completion of each step.

1. An associate in Facility Planning (FP) will contact and meet with the customer as necessary to assess the request and establish the appropriate solution for the signage need(s).
2. If an appropriate standard sign type is available, FP will select the applicable sign, develop documentation, review with the customer, and request a price quote from the preferred signage vendor.
3. If an appropriate sign is not available in the standard signage library, FP will work with the customer to develop designs and documentation, and request a price quote from the vendor.
4. Once the price quote is received from the vendor, it will be sent back to the customer for review and approval.
5. Upon customer approval, FP will request a purchase order (PO) for the signage. Once the PO has been released to the vendor, production of the signage will begin.
6. Once the signage is delivered, FP will coordinate with Facilities Services or the contracted signage installer for installation.

All signage orders placed outside of this process will be sent to an associate of FP for review of signage standards and vendor/purchasing policies.
INTRODUCTION

PROCESS

SIGNAGE COMMITTEE
The Signage committee is an ad-hoc committee that supports the University Signage Coordinator and the WMC Wayfinding and Signage Manager in signage review and approval as needed.

In addition, the Signage Committee:
- Annually reviews the USS and identifies needed modifications or updates to the policy, process or guidelines.
- Meets at least annually, and otherwise as necessary based on review supports needs, appeals or other agenda items brought to its attention.
- Considers appeals to the decisions of the University Signage Coordinator.
- Considers request for modifications or changes to the USS.

The Signage Committee consist of the following representatives:
- Standing Members:
  – University Signage Coordinator
  – Representative from WMC
  – University Landscape Architect
  – University Architect
  – Planning and Real Estate staff to represent alignment with wayfinding plan.
- Members as needed:
  – Representative of Office of Marketing and Communications for issues related to brand, visual identity or common mapping.
  – Representative of Public Safety for issues involving safety or security.
  – Representative of TTM as needed for signage related to traffic or transportation elements, or as a liaison with entity responsible for parking facilities.
  – Representatives of Advancement as need for signage related to donor or honorific recognition of affinity agreements.
  – Representative from Student Life.
  – Representative from Athletics.

APPEALS
Should an entity desire to contest all or a portion of the policy and guidelines found herein, or the decision taken by the University Signage Coordinator on a specific case, the following procedure must be allowed:
1. A variance request shall be forwarded to the Technical Services Group within Facilities Design and Construction describing the proposed deviation.
2. A Building Design Standards adjudication meeting will be held to review the request and approve or deny the request based solely on its individual merits.
3. If the requesting entity finds the decision of the adjudication unsatisfactory, a written appeal shall be elevated and issued to the attention of the Signage Committee.
4. The Signage Committee will discuss any and all formally presented appeals. The Committee will review all cases, and will pronounce the final arbitration.
5. The decision taken by the Signage Committee will be final and cannot be further appealed. Shall a deviation be granted, it will not constitute precedent for future or similar signage deviation request.

NAMING, COMMEMORATIVE, HONORIFIC
The university’s Office of Advancement is responsible for the naming of all campus buildings, spaces or other entities. Customers desiring to name a building or space must follow all established procedures for naming and must provide evidence of approval this before a signage proposal can be approved. The full current naming policy, including eligibility for various levels of recognition, is available at policies.osu.edu. It is the responsibility of the customer to seek out any updated documents or processes relating to naming from the Office of Advancement.

The system includes signage types which may be used for commemorative (donor) or honorific recognition, such as sign types EX-3, SP-1 and SP-2. More information about use of these sign types for commemorative and honorific recognition is outlined under sign type SP-3.

Primarily vehicular, pedestrian, parking garage and building identification signage will contain a shortened version of the name and should not be relied on for recognition.
INTRODUCTION

PROCESS

SIGNAGE FUNDING

Wayfinding Signage
New or replacement vehicular and pedestrian directional signage (for example, sign type EX-4) is typically funded as a stand-alone project through the capital planning process. In addition, capital funds may be requested for replacement of existing signage in designated zones of campus. If a construction project affects and entire campus district or zone, and involves the creation of new roads or pedestrian routes, that project will be required to include appropriate wayfinding signage as part of its contribution to the public realm. Changes or additions to existing wayfinding signage must be requested through the University Signage Coordinator and, if approved, will be funded by the requestor.

A fund for the routine maintenance of wayfinding signage is under review. Regular replacement of outdated maps will be funded through this maintenance program. If a project alters and area significantly, then that project will be responsible for funding map updates within the affected area.

Building Signage
Every new construction or renovation project is required to include funding for basic signage as appropriate to the scope of the project. Every capital project must include at a minimum:

- Building identification sign (types EX-1, EX-2, EX-3) - at least one sign at the primary entrance to the building.
- Interior wayfinding signs - including ADA-compliant room number, rest room, electrical equipment room, stair and elevator signage. May also include ADA-compliant sign frames with room numbers and removable inserts for labeling rooms.
- Building directory - at least one directory at the primary entrance to serve the whole building.

When a unit moves to a new building, that unit is responsible for all signage costs associated with the move, including providing or modifying signage in new location, and removing signage from previous location.

Commemorative and Honorific Signage
Commemorative signage must be funded by a project or the unit benefitting from the contribution if not related to a project. Honorific recognition must be funded out of project funds or by the unit requesting the naming if not related to a project. Historical or interpretive signage must be paid for by the unit requesting the signage. Administrative names are recognized only with building ID signage, which must be funded by a project or by the unit requesting the building name.

Commemorative or honorific recognition related to the renovation or construction of a building or outdoor space should be included in the scope and budget of the project and should be an integral part of the project’s design, subject to final approval by the University Signage Coordinator, University Architect and Landscape Architect, if applicable. The identification of fundraising and recognition strategies should occur as early as possible in the life of a project, so signage can be planned as the building or landscape design evolves.

If an existing building is renamed, but there is no project associated with the re-naming, the unit requesting the re-naming must fund any and all signage changes, which may including removing the name from a building or location previously named.

Parking Garage Signage
A stand-alone project will implement signage in all existing garages, with a visitor parking garages as a first priority. Additional garage signage may be required if current faculty/staff garages become available to visitors and/or patients full time, as existing garages are modified, or if new garages are constructed. All garage signage must conform to the guidelines, or variations approved by the University Signage Coordinator. Garage signage will be funded by the entity responsible for management of the garages (see contact list). Individuals and units with recommendations for new, additional or modified garage signage should contact the entity responsible for parking garages with their suggestions or requests.

University and WMC Signage
A customer requesting signage in a university or WMC building will be required to fund the requested signage including all fabrication and installation costs.

CONCRETE
1. All sign foundations shall be Cast in Place concrete with buff wash finish and 1” beveled edge.
3. Unless otherwise indicated on the Drawings, minimum 28 day compressive strength shall be 4,000 PSI.
4. Concrete slump shall be no less than 2 inches nor greater than 4 inches, determined in accordance with ASTM C 143.
5. Cement shall be Portland cement, conforming to ASTM C 150, Type I or II.
6. Aggregates shall conform to ASTM C 33. Aggregate for areas exposed to view shall be crushed limestone only.
7. Unprocessed band run materials shall not be used in any concrete mix.
8. Chemical Admixtures: Provide admixtures certified by manufacturer to be compatible with other admixtures and that will not contribute water soluble chloride ions exceeding those permitted in hardened concrete. Do not use calcium chloride or admixtures containing calcium chloride.
   • Water-reducing Admixture: ASTM C 49-4/C 494M, Type A.
   • Retarding Admixture: ASTM C 494/C 494M, Type B.
9. No calcium chloride or admixtures containing calcium chloride shall be added to concrete. No admixtures other than those specified shall be used in concrete without the specific written permission of the University Signage Coordinator in each case.
EXTERIOR SIGNS

EX-1 - Building ID Sign - Ground

FUNCTION
The primary purpose for this type of signage is to identify the building by name, address, code and number to pedestrian traffic. This type of sign is not intended for recognition or for use as a building directory.

LOCATION
Located at or near primary accessible pedestrian entrance to buildings or other facilities.

CONTENT

Building Name
- Short form of the building name, 4 word maximum.
- Maximum 2 lines of text.

Street Address
- Use OSU Assigned Street Address (see current contacts page)
- One line of copy only

Pictorial
- Symbol and text at the bottom right corner of each sign will be used to indicate the accessible building entrance.

Not Allowed
- College, department, section, unit or center names. University departments and units change names and locations frequently, and this creates confusion to the visitor. Building directories should be used to provide this information.
- Names of individual building parts or spaces. Individual destinations within a building may be considered for signage on a case by case basis if sufficient annual visitors or criticality of services can be established.
- Services or transaction points. If it is critical for visitors to know the location of a service or transaction point, a variation on retail signage may be considered.
- Full Donor or commemorative names. Other signage types have been developed to recognize honorific or commemorative names.

NUMBER
One per building, secondary entrances on a public street or primary pedestrian route will be identified using vinyl building names.
EXTERIOR SIGNS

EX-2 - Building ID Sign - Wall

FUNCTION
The purpose of this sign type is to identify the building name and address when:
• No good location exists for a ground mounted sign.
• To indicate a secondary entrance
To be sensitive to buildings historical character

LOCATION
The sign should be located at or near a pedestrian entrance to a building, visible from major pedestrian paths and unobstructed by vegetation or other objects.

Location must respect the architecture of the building and be approved by the University Architect

CONTENT
Content is limited to the name of the building (short form if purpose is Building ID).

NUMBER
One sign per building entry

Water Treatment Building

331 W. 18th Avenue
EXTERIOR SIGNS
EX-2H - Building ID Sign - Historic

FUNCTION
The purpose of this sign type is to identify historical buildings:
• No good location exists for a ground mounted sign.
• To indicate a secondary entrance.
• To be sensitive to buildings historical character.

LOCATION
The sign should be located at or near a pedestrian entrance to a building, visible from major pedestrian paths and unobstructed by vegetation or other objects.

Location must respect the architecture of the building and be approved by the University Architect.

CONTENT
Content is limited to the building name or building name and address.

NUMBER
One sign per building entry.
EXTERIOR SIGNS

EX-3 - Building Mounted Letters

FUNCTION
The purpose of this sign type is to identify the facility name. This sign type may be used:
• When no good location exists for a ground mounted sign.
• To indicate additional primary entrances.
• To recognize a donor or honorific name for a building or wing of a building.

LOCATION
Sign should be positioned on a building façade in view or major pedestrian walkways

Location must respect the architecture of the building and be approved by the University Architect.
Names should be sized to fit within a single area, surface or architectural element. Letters should not bridge two distinct areas, surfaces or elements.
If used for building identification, the letters should be mounted at or near the building entrance.
If used for donor or honorific recognition, recommended locations include:
• At or near the building entrance.
• On a smooth horizontal area, surface or element integral to the design of the building, such as a belt course, horizontal mullion or cornice.

CONTENT
Content is limited to:
• The name of the building.
• If the purpose is Building Identification, use a short or common form of the name.
• If the purpose is Donor or Honorific recognition, a fuller name may be used, keeping in mind that the longer the name the smaller the letters may be.

Not allowed on signage
College, department, section, unit or center names

NUMBER
Limited to one sign per building.

Additional signage may be considered:
• For distinctly separate building elements, such as wings, which have significant, unique identity or recognition needs.
• Only if the building’s architectural features, circulation, layout and pedestrian traffic volume justify such signage.
EXTERIOR SIGNS

EX-3 - Building Mounted Letters

COLORS
- Brushed Aluminum with clear coat
- Stainless Steel with clear coat

LETTERS
San Serif Font: Buckeye Sans
Serif Font: Buckeye Serif
- All uppercase
- Size will vary with length of name and location of letters.
- Letters should be proportional to the area on which the letters are mounted.
- 12” cap height is recommended for most applications.

GRAPHICS
Not needed for this sign.
EXTERIOR SIGNS

EX-3 - Building Mounted Letters

INSTALLATION
- Fabricated reverse channel letters, 1/8" Thick Wall
- Threaded studs with sleeves painted to match letter face, set with silicone adhesive.
- Letters to be mounted in a manner that does not damage the building materials or architectural elements.
EXTERIOR SIGNS
EX-4 - Wayfinding - Roadway Posts

FUNCTION
Provide drivers with advance directional information to
university destinations and parking facilities.

LOCATION
• City streets and campus roads with less than two lanes
  in each direction
• Placed perpendicular to the road, facing oncoming traffic
• Placement (height and location) to maximize visibility

CONTENT
Academic Campus - maximum of four (4) destinations
1st priority
• Primary Destinations
• Next Campus
• Visitor Parking garages, circle P
2nd priority
• Secondary Destinations
• Destinations which draw from outside region
3rd priority
• Tertiary destinations

Medical Campus
1st priority
• Emergency
• Visitor/Patient Garages, circle P
2nd priority
• Next campus
• Medical facilities in adjacent areas
3rd priority
• Other primary destinations in next campus
EXTERIOR SIGNS
EX-5 - Wayfinding - Monument, Not Illuminated

FUNCTION
The primary purpose of the small 2-sided vertical non-illuminated monument sign is for vehicular directional wayfinding at non-academic clinical/patient, performance focused or public safety locations open extended hours of operation. The small monument sign is used in large parking lots, loading areas, service roads and dock areas for vehicular wayfinding. This type of sign is not intended for recognition or for use as a building directory.

LOCATION
Located at intersections or primary access points leading to building entrances, loading and dock areas when wayfinding signs are needed. Location must respect the architecture of the building and landscape and be approved by the university architect.

CONTENT
Primary Identification - Text
- Building address when building is not on roadway
- Building name when building is not on roadway
- Directional roadway information
- Directional patient or valet drop off information
- Outpatient Care Information
- Clinical Information
- Specialty Services Information
- Public Safety Information

Secondary Identification - Symbols
- Directional Arrows
- International Hospital Symbol
- International Emergency Symbol
- International Parking Symbol
- International Valet Symbol

Not Allowed
- Department, section, unit names. University departments and units change names and locations frequently, and this creates confusion to the visitor. Building directories should be utilized to provide this information.
- Names of individual building parts or spaces. Individual destinations within a building may be considered for signage on a case by case basis if sufficient annual visitors or criticality of services can be established.
- Full donor or commemorative names. Other signage types have been developed to recognize honorific or commemorative names.
- Academic or research buildings not serving patient or visitor services.

NUMBER
One per roadway leading to building entrance, large parking lots, loading areas, service roads and dock areas. Secondary or access drives may be considered on case by case basis or approved by the University Architect.
EXTERIOR SIGNS

EX-6 - Service Courts

FUNCTION
Provide vehicular traffic identification of loading dock and service destinations.

LOCATION
- At loading dock and service area entrances
- Located along major roadways at loading dock and service courts navigation, drive access location, and navigation throughout the campus.

CONTENT
- Large, unique sequential service court number for recognition.
- Smaller text may be added for secondary building entry destination within service areas.

NUMBER
One sign located at each major vehicular traffic confluence point.
EXTERIOR SIGNS
EX-7 - Electronic Marquee

FUNCTION

This Section is Under Construction

LOCATION

CONTENT

NUMBER

Elevation Option 1
EXTERIOR SIGNS
EX-8 - Building Entrances - Door Decals

FUNCTION
To communicate that smoking and the use of tobacco are prohibited in or on all university owned, operated or leased property including vehicles by resolution of the Board of Trustees effective January 2014.

LOCATION
Signs are mounted on all entry doors of university owned buildings and leased properties. A minimum of one door at each pair of doors in series.

CONTENT
Messaging that communicates the University Tobacco Free Policy. To communicate that weapons, bikes, skateboard, rollerblades or pets are prohibited on or within Ohio State owned or leased properties. In some specific areas are subject to video recording and surveillance.

THE OHIO STATE UNIVERSITY
Building Hours:
This building is open during normal University business hours and for dedicated use (libraries, laboratories, auditoriums, etc.)
For other hours, access limited to authorized persons only
For special access or information contact Service2Facilities BM-257-HSP(4357)

**Street Address - Illuminated**
- Use OSU assigned street address (centered at top of sign).
- One line of copy only.

**Wordmark**
- Block O is internally illuminated for university branding and recognition.
- The Ohio State University in applied vinyl per branding standards.
- Linear or optional stacked wordmarks can be used.

**Building Name - Illuminated**
- Short form of the building name, 4 work maximum
- Maximum 2 lines of text.

**Secondary Identification - Illuminated**
- Outpatient Care
- Primary Care
- Specialty Services
- Rehabilitation Hospital
- Public Safety
- Institute
- Clinic

**Not Allowed**
- Department, section, unit names. University departments and units change names and locations frequently, and this creates confusion to the visitor. Building directories should be utilized to provide this information.
- Names of individual building parts or spaces. Individual destinations within a building may be considered for signage on a case by case basis if sufficient annual visitors or criticality of services can be established.
- Full donor or commemorative names. Other signage types have been developed to recognize honorific or commemorative names.
- Academic or research buildings not serving patient or visitor services.

**NUMBER**
One per building adjacent to main building entrance, secondary or access drives may be considered on case by case basis or approved by the university architect.
EXTERIOR SIGNS - ILLUMINATED
IX-6 - Building Wordmark - Large Horizontal

FUNCTION
The primary purpose of the internally illuminated rail mounted front lit acrylic wordmark sign is used for university branding at non-academic clinical/patient, performance focused or public safety locations open extended hours of operation. The scale of the wordmark must comply with all university branding requirements. The workmark cannot exceed 1 square feet of sign to each 100 lineal feet of building facade.

LOCATION
Located at the top left of the building facade facing the main building entrance.

Wordmark must respect the architecture of the building and must be approved by the university architect.

CONTENT

Wordmark
- Block O is front lit acrylic internally illuminated for university branding and recognition
- The Ohio State University is front lit rail mounted internally illuminated for university branding and recognition
- Linear or optional stacked wordmarks can be used.

Not Allowed
- Department, section, or unit names not approved by university branding for use with the workmark.
- Names of individual building parts or spaces. Individual destinations within a building may be considered for signage on a case by case basis if sufficient annual visitors or criticality of services can be established.
- Academic or research buildings not serving patient or visitor services

NUMBER
One per building adjacent to main building entrance, secondary or access drives. In areas with a larger concentration of performance focused, clinical/patient locations with extended hours will be evaluated on a case by case basis by the university architect to determine the appropriate amount allowed.
EXTERIOR SIGNS - ILLUMINATED

IX-7 - Branded Block O - Large

FUNCTION
The primary purpose of the internally illuminated Block O sign is used for university branding at non-academic clinical/patient, performance focused, public safety or regional campus locations open for extended hours of operation. The scale of the Block O must comply with all university branding requirements. The Block O should only be used in locations where the entire wordmark is too large for the building facade.

LOCATION
Located at the top left of the building facade or centered on an existing building feature facing the main building entrance.

Maintain the required clear space around the Block O to comply with all branding guidelines.

The Block O must respect the architecture of the building and use must be approved by the university architect.

CONTENT
Wordmark
- Block O is front lit acrylic internally illuminated for university branding and recognition

Not Allowed
- Academic or research buildings not serving patient or visitor services

NUMBER
One per building adjacent to main building entrance, secondary or access drives. In areas with a larger concentration of performance focused, clinical/patient locations with extended hours will be evaluated on a case by case basis by the university architect to determine the appropriate amount allowed.
**FUNCTION**
The primary purpose of the internally illuminated front lit acrylic address is used for building identification at non-academic clinical/patient, performance focused or public safety locations open for extended hours of operation. The scale of the address can range from 18”-40” numbers with 24” being the most common size. The address should be used appropriately and not be too large for the building facade.

**LOCATION**
Located primarily at the top right of the building facade or centered on an existing building feature facing the main building entrance.

Maintain clear space around the address to respect the architecture of the building and use must be approved by the university architect.

**CONTENT**

**Address**
- Only the official street address will be used for building identification.

**Not Allowed**
- Official street name, building and suite numbers.

**NUMBER**
One per building adjacent to main building entrance, secondary or access drives may be considered on case by case basis when the building faces major roadways or approved by the university architect.

**DETAIL**
- Buckeye Sans
- Semi Bold
- Standard sizes include 18”, 24” and 30”
- Custom size available upon request
**FUNCTION**
The primary purpose of the back lit “halo” internally illuminated building or donor sign is for recognition to match other building illuminated signs. Internally illuminated signage should only be used in locations where other building mounted illuminated signage exist.

**LOCATION**
Located adjacent to or centered over the primary accessible pedestrian entrance of the building. Donor signage should be located at a comfortable height for public view at the entrance for proper recognition.

In some instances it may be appropriate to have the building or donor signage at the top of the building at locations with primarily vehicular traffic facing major roadways for recognition.

Location of donor signage must respect the architecture of the building and be approved by the university architect.

**CONTENT**
Content is limited to:
- The name of the building
- If the purpose is Building Identification, use the a short or common form of the building name.
- If the purpose is Donor or Honorific recognition, a fuller name may be used, keeping in mind that the longer the name the smaller the letters will be.

**NUMBER**
Limited to one sign per building.

Additional signage may be considered:
- For distinctly separate building elements, such as wings, which have significant, unique identity or recognition needs.
- Only if the building's architecture features, circulation, layout and pedestrian traffic volume justify such signage.
- Additional donor signs will be considered on a case by case basis or approved by the university architect.

---

UNIVERSITY INTERIOR SIGNS
IN-1 - Room Number

FUNCTION
Room number signs include braille that uniquely identifies rooms within campus buildings to provide logical way-finding.

LOCATION
The top of Sign is located at 60 inches and minimum at 50 inches where other obstructions exist. The sign shall be located alongside the door at the latch side. Where there is no wall space at the latch or right side of double doors, signs shall be located on the nearest adjacent wall.

Spaces and Capital Projects within campus that ONLY require a room number plate and no additional labeling generally include:
• General use classrooms
• General use laboratories
• Custodial closets
• Mechanical rooms
• Utility and Trash Rooms
• Copy, Mail & Storage Rooms
• Staff Kitchens & Lounge Spaces
Space exceptions:
• Stairwell doors
• Corridor intersections
• Vestibules
• Lobbies
• Alcoves

CONTENT
The room numbers shall reflect the official room numbers assigned by Facilities Information and Technology Services (FITS).
UNIVERSITY INTERIOR SIGNS

IN-2 - Room ID - 1 Inch Slots

FUNCTION
1" x 6" Single or Multi-Slot Room numbers are intended to meet the needs of rooms that require labeling beyond the basic room numbering. Room numbers include braille that uniquely identifies rooms within campus buildings to provide logical way-finding.

LOCATION
The top of Single or Multi-Slot Signs are located at 60 inches and minimum at 50 inches where other obstructions exist. The sign shall be located alongside the door at the latch side. Where there is no wall space at the latch or right side of double doors, signs shall be located on the nearest adjacent wall.

Spaces that slotted insert signs are generally used:
- Offices/Administrative spaces
- Conference Rooms
- Meeting Rooms
- Seminar Rooms
- Library/Study Centers
- Copy, Mail & Storage Rooms
- Special Laboratory and Classrooms that have functional names attached

CONTENT
The room numbers shall reflect the official room numbers assigned by Facilities Information and Technology Services (FITS).

Uses UniPrint standard 1” x 6” slot.
Inserts are sold separately.
UNIVERSITY INTERIOR SIGNS

IN-3 - Room ID - 2 Inch Slots

FUNCTION
2” x 6” Single or Multi-Slot Room numbers are intended to meet the needs of rooms that require labeling beyond the basic room numbering. Room numbers include braille that uniquely identifies rooms within campus buildings to provide logical way-finding.

LOCATION
The top of Multi-Slot Signs are located at 60 inches and minimum at 50 inches where other obstructions exist. The sign shall be located alongside the door at the latch side. Where there is no wall space at the latch or right side of double doors, signs shall be located on the nearest adjacent wall.

Spaces that slotted insert signs are generally used:
- Offices/Administrative spaces
- Conference Rooms
- Meeting Rooms
- Seminar Rooms
- Library/Study Centers
- Copy, Mail & Storage Rooms
- Special Laboratory and Classrooms that have functional names attached

CONTENT
The room numbers shall reflect the official room numbers assigned by Facilities Information and Technology (FITS).

Uses UniPrint standard insert 1” x 6” and 2” x 6” slot. (Inserts sold separately $5.00)
UNIVERSITY INTERIOR SIGNS

IN-4 - Room ID - Window

FUNCTION
Room ID with window is intended to meet the needs of rooms that require labeling beyond the basic room numbering. Room numbers include braille that uniquely identifies rooms within campus buildings to provide logical way-finding. The 8.5” x 11” insert holder can provide additional information about the use or schedules for the space.

LOCATION
The top of Multi-Slot Signs are located at 60 inches and minimum at 50 inches where other obstructions exist. The sign shall be located alongside the door at the latch side. Where there is no wall space at the latch or right side of double doors, signs shall be located on the nearest adjacent wall.

Spaces that slotted insert signs are generally used:
• Suites
• Conference rooms
• Meeting Rooms
• Event spaces requiring schedules

CONTENT
The room numbers shall reflect the official room numbers assigned by Facilities Information and Technology Services (FITS).

Holds any 8.5” x 11” paper insert. Insert content shall follow university branding guidelines.
UNIVERSITY INTERIOR SIGNS

IN-5 - Restroom

FUNCTION
To identify all public, gender-inclusive, and family or assisted-use restroom facilities within campus buildings.

LOCATION
Tactile restroom signs shall be upper case letters only located at 50 inches minimum and 60 inches maximum. The sign shall be located alongside the door at the latch side. Where there is no wall space at the latch or right side of double doors, signs shall be located on the nearest adjacent wall.

Pictogram Fields shall have a field height of 6 inches maximum. Characters and braille shall not be located in the pictogram field. The pictorial shall be centered directly under the tactile restroom sign.

CONTENT
Signs must include the text “MEN,” “WOMEN,” or “RESTROOM” and appropriate pictorial, accessibility symbol, and room number.

The room numbers shall reflect the official room numbers assigned by Facilities Information and Technology (FITS).
UNIVERSITY INTERIOR SIGNS
IN-6 - Lactation Room

FUNCTION
This sign is used to indicate a lactation room.

LOCATION
The sign shall be located at 60 inches and minimum at 50 inches where other obstructions exist. The sign shall be located alongside the door at the latch side. Where there is no wall space at the latch or right side of double doors, signs shall be located on the nearest adjacent wall.

CONTENT
The room number shall reflect the official room number assigned by Facilities Information and Technology (FITS).
UNIVERSITY INTERIOR SIGNS
IN-7 - In-Use Slider

FUNCTION
• 4” x 7.5” overall.
• These signs are used to indicate whether or not a room is currently in use.

CONTENT
Acrylic slider.

LOCATION
Located tight to the bottom of room signs at conference rooms, lactation rooms and reserved spaces.
UNIVERSITY INTERIOR SIGNS

IN-8 - Building Directory - Vista Board

FUNCTION
Menu boards are recommended for use when directory text changes are anticipated. Menu boards seem to work best where posting of general information is desired.

Paper inserts are removable for updating building destinations.

LOCATION
Vista Directories Boards are located in close proximity to the main and high traffic secondary building entrances. They should be placed in a location that is visible to those entering the building. Floor menu boards should be placed at elevator lobby walls that are visible when entering or exiting the elevator.

Large
Vista Building Directories should list each floor with key destinations including room numbers on each level. Examples of key destinations could include department offices, main conference spaces, restrooms and other areas on the floor.

Small
Vista Elevator Directories should be limited to only the destinations located on that level, arrows can also be used in addition to the room numbers for difficult to find spaces.

Alternate Directories can be freestanding map directories. If map directories are desired, then professionally created maps are required along with written spaces and room numbers below the map. All map directories require approval of the University Signage Coordinator.

INSTALLATION - INTERIOR
Standard Signs - Single Door, In-Swinging

MOUNTING HEIGHTS
The top of the sign is located at 60 inches and minimum at 50 inches where other obstructions exist.

Note: ADAAG 703.4.1 Tactile characters on signs shall be located 48 inches minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60 inches maximum.

LOCATION
Wall mounted signs should be installed on the latch side of the door. Maintain a distance of 3" between the edge of the sign and the door frame.

NO SIGNS MAY BE INSTALLED ON DOORS, unless there is no other option available.

Where space is not available on the latch side of the door, use the following locations in order of preference:
1. Hinge side of the door.
2. Nearest wall adjacent to the door latch.
3. On door if no other option is available.

INSTALLATION METHOD
Install signs on clean, non-porous surfaces with adhesive tape.

Silicone caulk may be added for installation on wallcovering surfaces.

Mechanical or through-face fasteners are not permitted.

Note: If you are not able to install the signs as indicated in the guide, please contact the University Signage Coordinator for alternate installation instructions.
INSTALLATION - INTERIOR

Standard Signs - Single Door, Out-Swinging

MOUNTING HEIGHTS
The top of the sign is located at 60 inches and minimum at 50 inches where other obstructions exist.

Note: ADAAG 703.4.1 Tactile characters on signs shall be located 48 inches minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60 inches maximum.

LOCATION
All wall mounted signs should be installed on the latch side of the door. On out-swinging doors measure 18” from the frame and install sign centered in the 18” space.

NO SIGNS MAY BE INSTALLED ON DOORS, unless there is no other option available.

Where space is not available on the latch side of the door, use the following locations in order of preference:
1. Hinge side of the door.
2. Nearest wall adjacent to the door latch.
3. On door if no other option is available.

INSTALLATION METHOD
Install signs on clean, non-porous surfaces with adhesive tape.

Silicone caulk may be added for installation on wallcovering surfaces.

Mechanical or through-face fasteners are not permitted.

Note: If you are not able to install the signs as indicated in the guide, please contact the University Signage Coordinator for alternate installation instructions.
INSTALLATION - INTERIOR

Standard Signs - Double Door, In-Swinging

MOUNTING HEIGHTS
The top of the sign is located at 60 inches and minimum at 50 inches where other obstructions exist.

Note: ADAAG 703.4.1 Tactile characters on signs shall be located 48 inches minimum above the finish floor or ground surface, measured from the baseline of the lowest tactile character and 60 inches maximum.

LOCATION
All wall mounted signs should be installed on the latch side of the door. Maintain a distance of 3" between the edge of the sign and the door frame.

NO SIGNS MAY BE INSTALLED ON DOORS, unless there is no other option available.

Where space is not available to the right of the right hand door, use the following locations in order of preference:
1. Nearest wall adjacent to the right side of the right hand door.
2. The left side of the left-handed door.
3. On the door if no other option is available.

INSTALLATION METHOD
Install signs on clean, non-porous surfaces with adhesive tape.

Silicone caulk may be added for installation on wallcovering surfaces.

Mechanical or through-face fasteners are not permitted.

Note: If you are not able to install the signs as indicated in the guide, please contact the University Signage Coordinator for alternate installation instructions.
INSTALLATION - INTERIOR

Standard Signs - Double Door, Out-Swinging

LOCATION
All department signs should be located 6” from the standard room sign with the bottoms aligned.

INSTALLATION METHOD
Install signs on clean, non-porous surfaces with adhesive tape. This includes repairing and painting doors.

Note: If you are not able to install the signs as indicated in the guide, please contact the University Signage Coordinator for alternate installation instructions.
FUNCTION
To identify parking garage buildings by displaying the garage name, address and current access status to staff and/or visitors. Primary sign type used to identify garages.

CONTENT
Parking Symbol
Immediately recognizable universal parking symbol used consistently throughout all campus signage, maps, and supporting wayfinding materials to identify parking garage locations.

Garage Name
- Official name of the parking garage as assigned by Ohio State.
- Maximum 4 lines of copy.

Street Address
- Official Street Address as assigned by Ohio State.
- Maximum 2 lines of copy.

Digital Reader Board
Displays a custom message managed by CampusParc. May include welcome message, current access, special event use, alternate parking locations.

LOCATION
At or near primary garage entrances where there is sufficient ground area and setback from the roadway.
FUNCTION
To identify parking garage buildings by displaying the garage name, address and current access status to staff and/or visitors. Used when there is no suitable location for EX.1M.

CONTENT
Parking Symbol
Immediately recognizable universal parking symbol used consistently throughout all campus signage, maps, and supporting wayfinding materials to identify parking garage locations.

Garage Name
- Official name of the parking garage as assigned by Ohio State.
- Maximum 4 lines of copy.

Digital Reader Board
Displays a custom message managed by CampusParc. May include welcome message, current access, special event use, alternate parking locations.

LOCATION
Building-mounted at or near primary garage entrances where there is a suitable, visible location on the garage structure. Minimum mounting height of 12’0” AFF.
**FUNCTION**
To identify parking garage buildings by displaying the garage name. Typically used for secondary entrances; or in combination with EX.1MRB when there is no suitable location for EX.1W.

**CONTENT**
**Parking Symbol**
Immediately recognizable universal parking symbol used consistently throughout all campus signage, maps, and supporting wayfinding materials to identify parking garage locations.

**Garage Name**
- Official name of the parking garage as assigned by Ohio State.
- Maximum 4 lines of copy.

**LOCATION**
Building mounted at or near primary and/or secondary garage entrances where there is a suitable, visible location on the garage structure. Can also be mounted high on a building to provide visibility from a long distance. Minimum mounting height of 12’0” AFF.
FUNCTION
To display welcome message; to indicate current access status to staff and visitors. Typically used in combination with EX.1WS.

CONTENT
Digital Reader Board
Displays a custom message managed by CampusParc. May include welcome message, current access, special event use, alternate parking locations.

LOCATION
At or near primary garage entrances, typically integrated into building architecture where there is a suitable, visible location to avoid obstructing sidewalks.
PARKING GARAGE
EX.2WE - Garage Entry ID - Canopy

FUNCTION
To enhance primary visitor garage entrances by displaying the garage name and address. For use on visitor garages only.

CONTENT
Garage Name
- Official name of the parking garage as assigned by Ohio State.
- Maximum 4 lines of copy.

Street Address
- Official Street Address as assigned by Ohio State.
- Maximum 2 lines of copy.

LOCATION
At visitor garage primary entrances directly above the entry lane(s).

... continued on next page
EXAMPLES
Below are examples of how EX.2WE can be applied to visitor garage entrances.

12th Avenue Garage

Tuttle Park Place Garage

Lane Avenue Garage

Neil Avenue Garage

Ohio Union South Garage
PARKING GARAGE

EX.3M - Parking Entry ID - Freestanding

FUNCTION
To identify a secondary entrance when there is no suitable location for EX.1WS.

CONTENT
Parking Symbol
Immediately recognizable universal parking symbol used consistently throughout all campus signage, maps, and supporting wayfinding materials to identify parking garage locations.

Garage Name
- Official name of the parking garage as assigned by Ohio State.
- Maximum 4 lines of copy.

LOCATION
At a secondary garage entry where an EX.1WS is not feasible and where there is sufficient ground area and setback from the roadway.
PARKING GARAGE

EX.4M - Parking Entry ID - Freestanding

FUNCTION
To direct drivers to a primary garage entrance where it is not clearly visible from a primary street.

CONTENT
Parking Symbol
Immediately recognizable universal parking symbol used consistently throughout all campus signage, maps, and supporting wayfinding materials to identify parking garage locations.

Arrow
Directional arrow, as applies.

LOCATION
At locations where the primary entrance is not clearly visible from the primary street and where there is sufficient ground area and setback from the roadway.
FUNCTION
- To alert drivers to the lowest clearance height in the garage.
- To keep high clearance vehicles from entering.

CONTENT
**Clearance Height**
Announce lowest clearance inside garage.

LOCATION
Immediately inside all entry lanes into the garage.
FUNCTION
- To alert drivers to the lowest clearance height.
- To display wayfinding options or other information at the initial decision point inside the garage.

CONTENT
Directional Message
Overhead display of a variety of directional, informational, and precautionary messages. See parking directional layouts for typical examples.

Bang Bar
Announce lowest clearance in the garage.

LOCATION
At vehicular garage entrances where EX.2WE is not being used. Typically at secondary vehicular entrances.
PARKING GARAGE

PD.1.2 - Parking Directional - Ceiling Mount

FUNCTION
To display wayfinding options or other driver-related information.

CONTENT

Arrow
Directional arrow, as applies.

Traffic Symbol
Displays direction of traffic. Reference PD.1.1 for typical examples.

Primary Message
Overhead display of a variety of directional, informational, and precautionary messages. See parking directional layouts for typical examples.

LOCATION
Suspended overhead at vehicular decision points, centered on drive aisle.
FUNCTION
To display wayfinding options or other driver-related information.

CONTENT
Arrow
Directional arrow, as applies.

Traffic Symbol
Displays direction of traffic. Reference PD.1.1 for typical examples.

Primary Message
Overhead display of a variety of directional, informational, and precautionary messages. See parking directional layouts for typical examples.

LOCATION
Surface-mounted on walls or beams at decision points, centered on drive aisle.
**FUNCTION**
To display pedestrian-oriented information.

**CONTENT**
*Arrow*
Directional arrow, as applies.

*Symbols*
Varies depending on associated information.

*Primary Message*
Overhead display of directional or informational copy.

**LOCATION**
Suspended overhead at pedestrian decision points, centered over pedestrian walkway.
PARKING GARAGE
PN.1L - Parking Info - Large, Post Mount

FUNCTION
To display hourly rates and related information in garages.

CONTENT
Primary Message
Hourly rates, to be provided by CampusParc.

Secondary Messages
As shown. Message may vary based on garage use.

Not Allowed
Any information that does not pertain specifically to parking, hourly rates, or contact information for parking operator.

LOCATION
Locate at all public vehicular garage entrances.
**FUNCTION**
To display hourly rates and related information in garages.

**CONTENT**
**Primary Message**
Hourly rates, to be provided by CampusParc.

**Secondary Messages**
As shown. Message may vary based on garage use.

**Not Allowed**
Any information that does not pertain specifically to parking, hourly rates, or contact information for parking operator.

**LOCATION**
Adjacent to pay machines.

PARKING GARAGE
PN.2L - Parking Info - Large, Wall Mount

FUNCTION
To provide information on regulations, additional parking locations, or any supporting information as required.

CONTENT
Primary Message
Primary message as required. Message may not occupy more than 6 lines of text.

Secondary Message
Supporting copy as required.

Symbol
Symbol is used to reinforce message.

LOCATION
At all public pedestrian entrances where required.
FUNCTION
To provide information on regulations, additional parking locations, or any supporting information as required. Preferred size for regulatory messages.

CONTENT
Primary Message
Primary message as required. Message may not occupy more than 6 lines of text.

Secondary Message
Supporting copy as required.

Symbol
Symbol used to reinforce message.

LOCATION
At all public pedestrian entrances where required. No-smoking messages are required at every pedestrian entrance.
PARKING GARAGE
PN.2S - Parking Info - Small, Wall Mount

FUNCTION
To provide information on regulations, additional parking locations, or any supporting information as required.

CONTENT
Primary Message
Primary message as required. Message may not occupy more than 6 lines of text.

Secondary Message
Secondary message as required.

Symbol
Symbol used to reinforce the regulatory message.

LOCATION
Locate at elevator lobbies adjacent to elevator call button panel.

No Rollerskating, Skateboarding, Roller Blading Allowed in this Area
Ohio Revised Code 2911.21
PN.4 - Parking Info - Liability

FUNCTION
The primary purpose for this type of signage is intended to communicate liability limits.

CONTENT
Message as provided by CampusParc.

LOCATION
Locate at all vehicular entrances.

CampusParc does not guard or assume car custody or control of your vehicle or its contents and is not responsible for fire, theft, damage or loss. The owner alone is responsible for parking and locking their car.
PARKING GARAGE

PW.1 - Pedestrian Info - Elevators, Stairs

FUNCTION
To identify public elevator lobbies and stairwells. To display the level number and color. To accentuate the level color from different viewing angles.

CONTENT
Primary Message
Elevator and/or stair message.

Symbol
Elevator and stair symbols reinforce primary message.

Garage Level
Floor level number.

Not Allowed
- Any messages or symbols other than those shown.
- Any colors other than those specified for each level.

LOCATION
At all public elevator lobbies and stair towers.

... continued on next page
EXAMPLES
Below are examples of how PW.1 can be applied to elevator lobbies and/or stair towers.

12th Avenue Garage

Tuttle Park Place Garage

Ohio Union South Garage

Lane Avenue Garage
FUNCTION
To identify the garage and level; to display supplemental information.

CONTENT

Garage Level
Floor level number.

Garage Name
Use the full name of the parking garage. Two line maximum.

Primary Message
Pedestrian wayfinding information.

Message with Symbol
Pedestrian wayfinding information with supporting symbol where applicable.

LOCATION
At elevator lobbies adjacent or between elevator doors.
PARKING GARAGE
PW.2S - Pedestrian Info - Level ID at Stairs

FUNCTION
To identify the garage and level; to display supplemental information.

CONTENT
Garage Level
Floor level number.

Garage Name
Use the full name of the parking garage. Two line maximum.

Primary Message
Pedestrian wayfinding information.

Message with Symbol
Pedestrian wayfinding information with supporting symbol where applicable.

LOCATION
At each stair landing; inside the stairwell if enclosed.
FUNCTION
To provide pedestrian with a wayfinding overview of the campus before exiting the garage.

CONTENT
Garage Level
Floor level number.

Garage Name
Use the full name of the parking garage. Two line maximum.

Primary Message
Location confirmation to orient visitors.

Secondary Message
"Please take your ticket.." message.

Campus Map
Ohio State to provide map artwork.

LOCATION
At elevator lobbies and/or primary pedestrian circulation entrances. Typically located across from elevator doors where applicable.
PARKING GARAGE

PW.4 - Pedestrian Info - Level ID & Zone

FUNCTION
To direct returning pedestrians to the appropriate level zone.

CONTENT
Arrow
Directional arrow, as applies.

Garage Level
Floor level number.

Zone
North/South or East/West. Varies per garage.

LOCATION
Adjacent to a PW.3; can also be located at other primary pedestrian circulation nodes as needed. Typically located across from elevator doors where applicable.
PW.5 - Pedestrian Info - Pay Machines

FUNCTION
To direct pedestrians to pay machine locations.

CONTENT
Primary Message
Message as provided by CampusParc.

Secondary Message
Message as provided by CampusParc.

Symbol
Ticket symbol.

LOCATION
At all pedestrian entrances and exits where no pay machine is located.
**FUNCTION**
To identify each zone and level in the garage, available in 1-sided, 2-sided, 3-sided, and 4-sided variations.

**CONTENT**

**Garage Name**
Use the full name of the parking garage. Two line maximum.

**Garage Level**
Floor level number.

**Zone**
North/South or East/West. Varies per garage.

**LOCATION**
On or around columns at the designated level. Do not locate on columns located in the middle of vehicular ramps.

On rectangular columns, only apply to faces visible from pedestrian and vehicular traffic. When two sides of the same column face different levels or zones, use 1-sided panels on opposite sides of the column.

On round columns, wrap entire column. Only apply graphics to the faces visible from pedestrian and vehicular traffic. Maximum of two graphics on opposite sides per round column.
PC.1 - Pedestrian Info - at Columns

North Layout

South Layout

... continued on next page
FUNCTION
To identify one-way ramps.

CONTENT
Message
“ONE WAY”

Arrow
Diagonal arrow pointing in the direction of ramp.

LOCATION
On column faces visible from vehicular traffic at both ends of each ramp.
PF.1 - Safety - Fire Extinguisher

FUNCTION
To identify fire extinguisher locations and allow them to be visible above parked vehicles.

CONTENT
Symbol
Fire extinguisher symbol.

LOCATION
Overhead wall mount centered over fire extinguisher cabinet below.
PARKING GARAGE
PR.1.1 & PR.1.2 - Regulatory - Parking

FUNCTION
To identify parking stalls reserved for specific functions, i.e., disabled parking, expectant mother parking, 30-minute loading zone.

CONTENT
Symbol
Symbol to support primary message.

Primary Message
Specified parking stall function.

Secondary Message
Cautionary fines.

LOCATION
At the head of each reserved parking stall: PR.1.2 where there is an available wall surface facing the head of the parking stall, PR.1.1 where there is no suitable wall surface.
PARKING GARAGE
PR.2 - Regulatory - Accessible Route

FUNCTION
To identify accessible paths of travel for people with disabilities.

CONTENT
Message
Specify location of accessible path.

Symbol
Symbol to support message.

Arrow
Directional arrow, as applies.

LOCATION
Required at the head of any inaccessible path of travel; provides directional information to the nearest accessible path.
SPECIALTY SIGNS

SP-1 - Commemorative Plaques

FUNCTION
To recognize a person or event of importance to the university. May be used to tell the story of historic persons or events or of those providing a gift to the university.

CONTENT
This type of signage provides the opportunity to more fully tell the story of a person or event of importance to the university or a major donor to the university, and may include the following types of information:
- Full name of donor, event or honoree
- Information about honoree or event, such as historical context, dates, etc.
- In the case of a donor, information may include reason for donation, history of donor and/or family, relevance of university, location, building or program to donor and family, etc.

LOCATION
Location will vary with the purpose of the plaque, but some examples include:
- In a landscaped area, mounted on a post or non-plant landscape element, such as a rock, wall or bench.
- Mounted on the exterior of a building in a location that does not obscure or damage architectural features or interfere with information signage.
- Mounted inside a building in a public area such as a lobby, pre-function or reception area.

All exterior locations must be approved by the University Landscape Architect.

All building mounted and interior locations must be approved by the University Architect.
SPECIALTY SIGNS
SP-2 - Tree Plaque

FUNCTION
To identify commemorative trees, which are planted in memory or honor of a person or event of significance to the university.

Requests for all commemorative tree plantings must be submitted to the University Landscape Architect. Please provide the following information:
- Reason for the request (person or event being commemorated)
- Desired type of tree (shade, evergreen, ornamental)
- Preferred location or area of campus
- Text to be displayed on the plaque (see content standards below)

CONTENT
- Latin and common Name of Tree
- Description of reason for commemoration (“In Memory of,” “Honoring the first ...,” etc.)
- Name of person or event being commemorated
- Dates of event or person’s life

LOCATION
All locations must be approved by the University Landscape Architect.

Some areas of campus are designated as “off limits” for additional markers or memorials. These include the Oval, Mirror Lake Hollow (including the South Oval), All American Buckeye Grove south of Ohio Stadium, and lands set aside for Chadwick Arboretum use.
FUNCTION
To recognize the naming of buildings, portions of a building, spaces, or programs for a person who has made a contribution to the university.
- Commemorative signage recognizes contributions of financial resources or goods and services to the university.
- Honorific signage recognizes significant, non-monetary contributions or service to the university.

CONTENT, LOCATION
Entire buildings with a commemorative or honorific name:
- Exterior pin mounted letters (see sign type EX-3).
- Interior plaque describing the reason for the naming and telling the story of the donor or honoree (see sign type SP-1).
- A shortened version of the building name will be used on the building ID sign (sign types EX-1 and EX-2).

Parts of a building with a commemorative or honorific name:
- Visibly differentiation building parts, such as clearly separated wings: each part may have pin mounted letters recognizing individual donors (see sign type EX-3).
- In the case of individually named wings or parts, a single building name must be determined.
- Specific elements such as interior wings, floors, or rooms with a commemorative or honorific name will be recognized by interior signage, which may include:
  - Small plaques located at individual named spaces or at each floor (custom design)
  - Cumulative donor participation displays in a public interior space (custom design)

Exterior spaces with a commemorative or honorific name:
- Commemorative plaque, mounted on a post or non-plant landscape element (such as a rock, wall or bench) to identify the name of the space and, if desired, provide background on the donor or honoree. (see sign type SP-1)

Programs with a commemorative or honorific name:
(College, department, program or center):
- Interior signage that is integrated with the interior architecture of the building. Examples include:
  - Interior wall mounted lettering
  - Plaques
  - Lobby display/donor board
- Location of signage for named colleges, departments or programs will have a relationship to a physical location, for example:
  - Building lobby, if the entity is the primary occupant of the building
  - Lobby signage that allows for multiple units for entities that share a physical location with others, or
  - At the entrance to and administrative or dean/chair’s office suite for entities that share a physical location with others

Building names with historical significance:
- If a building or exterior space has a historical name which honors an individual and records substantiate its approval by the BoT, the building name may be recognized in the same manner as a commemorative or honorific naming.
- In addition, an interior plaque may be provided which outlines the history of the honoree.
- Administrative names with historical significance will be recognized only in shortened version on standard building ID signage, but buildings with such names may also have a plaque inside which outlines the significance of the name.

All site locations must be approved by the University Landscape Architect.

All building mounted and interior locations must be approved by the University Architect.

DESIGN
Commemorative or honorific recognition related to the renovation or construction of a building or outdoor space should be designed as an integral part of the architecture, subject to final approval by the University Architect and University Landscape Architect, if applicable.

Commemorative or honorific recognition related to an existing building or space may utilize standard sign types (for example EX-3 and SP-1). Custom interior recognition signage may be designed to compliment the architecture of the building.
**SPECIALTY SIGNS**

**SP-4 - Retail Signage**

**FUNCTION**
Commercial signs on campus are intended to identify locations of commercial services to pedestrians. Commercial activity includes internal or external providers of commercial services, such as food service, bookstores, and other retail establishments. Commercial signage oriented toward vehicular traffic is not acceptable.

**CONTENT**
- Total signage may not exceed 5 sq.ft.
- Design must be compatible with the architecture of the building upon which the sign is installed.
- Illumination must be from an external source. Internally illuminated signs are not permitted.
- Back-lit letters may be permitted on case-by-case basis, if they do not compete with other building identification.
- Design, including colors, letter and graphics, must be approved by the University Signage Coordinator and the University Architect.

**LOCATION**
Primary establishment identification will be near a pedestrian entrance to the building. Retail establishments will not be identified on building identification signage or vehicular wayfinding signage. All locations and designs must be approved by the University Architect. Acceptable locations include:
- Perpendicular, projecting from the building near the entrance to the establishment
- Within a signage band above the primary, ground level entry and windows into the establishment if this can be designed to be compatible with the architecture
- Other locations may be considered on a case by case basis if pedestrian visibility is a concern or due to unusual existing constraints.
- Retail operations with a direct access to the exterior door may post a small graphic on the door glass with name of the establishment and hours of operation.

**INSTALLATION**
- Installation must be reversible and must not damage building materials or obscure architecturally significant elements.
- Installation details must be reviewed and approved by University Signage Coordinator and University Architect.
FUNCTION
• To add ambiance to the campus by promoting campus seasons, festivities and events.
• Banners should be used for short-term events only.
• Banners may be installed up to 10 days before the beginning of an event or season and must be removed within one week after the end of the event or season.

CONTENT
• Banners may not be used for commercial advertising, advertising or promoting any political candidate, parties or issues, or identifying, advertising or promoting any religion.
• Content may be generic in nature, graphically, symbolically or verbally representing or depicting the university or the university community.
• Content may graphically, symbolically or verbally represent or promote nonprofit cultural, educational or civic events, activities or facilities of general public interest. In consideration of the public benefit, a commercial institution or institutions who are the prime sponsor(s) of a cultural or civic event or activity of general public interest may be given sponsorship credit on the lower 10% of the banner.
• The name “The Ohio State University” will appear within the graphics of the banner or be contained as a separate line of copy within the lower 10% of the banner.

Number
No more than two banners per light pole.

Design
• All designs must be reviewed and approved by the University Signage Coordinator.
• Banners shall be made of high quality, flame retardant canvas or other awning material. Material shall be opaque, non-shrinking, water and fade resistant.

LOCATION
• To be located only on cast iron decorative light poles that are designed to accommodate banner arms.
• Light poles on the Oval may not be used for banners except for university promotions coordinated through University Communications.
• Decorative light poles on N. High Street between W. 15th Ave. and W. 17th Ave. are reserved in perpetuity for use by Wexner Center for the Arts to promote their events.
• Use of other light poles on N. High Street requires a separate signed letter of agreement with the City of Columbus before approval. Contact the University Signage Coordinator for a copy of the letter of agreement.
• Light poles on Fred Taylor Drive and Borror Drive are reserved for use by the Schottenstein Center and the Department of Athletics to promote events in that part of the campus.

INSTALLATION
• Size of banners are 30” x 60” on 20’ pole heights and 18” x 36” on 14’ pole heights.
• 30” x 60” banners can only be used across Woody Hayes Bridge on 14’ poles.

NOTE: See TM-3 for Banner Submittal Requirements
TEMPORARY SIGNS

TM-2 - Banner - Wall-Mounted

FUNCTION
- Advertising of events and activities with large audiences and regional draw.
- Large format wall banners are intended to be time-limited.
- Banners must be removed within one week of the conclusion of the event or season.

CONTENT
Events being promoted must:
- Be sponsored by the central university or the written consent of the President’s Cabinet.
- Have a strong relationship to the mission of the university.
- Have a broad appeal, or attract a large regional, national or international audience.
- The university reserves the right to deny any requests deemed inappropriate.

Examples include
- Ohio State University’s sporting events and seasons
- Significant charitable or educational events that are sponsored, directly support the university and have a broad participant base, such as Pelotonia.

Not Permitted
- Commercial interest information
- Events lasting more than 1 semester (other than sports seasons) require written approval.
- Non-university event related information.
- Secondary organizations, units or departments that support the university.
- Third-party advertising

Number
Maximum of one banner per building.

Design
- All designs must be reviewed and approved by the University Signage Coordinator.
- Banner graphics may accommodate the individual look of each event, but must maintain clear ties to The Ohio State University brand.

LOCATION
- All locations must be approved by the University Architect.
- Acceptable locations will be limited to:
  – Schottenstein Center
  – St. John Arena
  – Ohio Union
  – Others as approved by the University Architect

INSTALLATION
The size of the banner must be proportional to the building on which it is mounted. A drawing showing the proposed design of the banner, its size and its location must be submitted for approval as outlined in the approval process.

Banners must be installed in a manner which does not damage the building envelope during installation or removal. The University Architect or designee will approve all proposed installation details.

NOTE: See TM-3 for Banner Submittal Requirements

Banners may not cover windows or other architectural elements or details.
Banners may not be installed on buildings with historic significance, such as the Ohio Stadium.
BANNER SUBMITTAL PROCESS

Initiate
A Sign Request Form shall be submitted for all banner requests. This form is found at: fod.osu.edu/make-request#signagerequest

Timeline
Submit banner request at least 8 weeks prior to desired date of installation.
• Allow 3 weeks for review/approval
• Allow 5 weeks for fabrication/installation

Submit
• include items below on Sign Request Form.
• Name of sponsoring group (with contact person identified)
• Written business purpose for display banner
• Start and end dates of the event/promotion
• Documentation of support from the sponsoring group’s administrative officer
• Camera ready copy of the banner design (8 1/2 x 11 format, artwork can be emailed to signage@osu.edu or uploaded to BuckeyeBox)
• List and or plan of proposed locations

Review
The University Signage Coordinator will distribute all submittal items for review to the following:
• University Communications To determine “appropriateness” of project request
• University Branding for brand guideline compliance.
• Facilities Operations and Development (FOD) University Architects to determine if request can be physically accommodated and is appropriate for the proposed building(s).
• Other Administrative Units as deemed necessary to complete the review/approval process

Ruling
• Upon receiving all review comments, the University Signage Coordinator will provide an Approval, Approval w/ Conditions, or Denial to the requestor.
• Rulings can be appealed only to the Presidents Cabinet within one week of receiving a ruling. All (Presidents Cabinet) rulings will be final. The university reserves the right to deny any appeal requests.

INSTALLATION, MAINTENANCE, REMOVAL
• The University Signage Coordinator will provide quotes for the requested banner using pre-qualified university vendors.
• Requestor will arrange for delivery of finished banners to FOD for installation. The requestor is responsible for all costs associated with installation and removal.
• Requestor is responsible for maintaining banners in good condition for the duration of the display. All costs associate with maintenance, removal and replacement of banners are the responsibility of the requestor.
• Damaged banners must be removed or replaced promptly when directed to do so by the University Signage Coordinator or FOD.
• Requestor is responsible for all costs associated with building facade cleaning, painting or other damages caused from banner installation and or removal.
TEMPORARY SIGNS
TM-4 - Construction - Exterior

FUNCTION
To identify and provide information about capital projects.

CONTENT
Facilities Operations and Development’s Project Manager will provide to the University Signage Coordinator content for sign, which may include images of final design, project purpose and metrics (size, scale), schedule and contact information. When providing content, remember this is an opportunity to communicate with others what we do (5 words or less).

Number
Typically, one sign per construction site. If site is visible from more than one major street, additional signs may be considered.

LOCATION
Mounted on construction barricade or fence. Sign shall be visible to university patrons.

MARION - SCIENCE & ENGINEERING BUILDING

HIGHLIGHTS
• Two story building for Biology, Chemistry, Earth Sciences, Physics & Engineering
• Updates to utilities, parking, campus roads, pedestrian/bike amenities

BENEFITS
• Support new academic initiatives and collaboration
• Provide additional teaching, research, and collaboration space
• Create modernized and flexible learning environments
• Promote energy efficiency and sustainability

TIMELINE
• Spring 2016 - Summer 2017
TEMPORARY SIGNS
TM-5 - Construction - Interior

FUNCTION
To identify and provide information about capital and renovating projects.

CONTENT
Facilities Operations and Development’s Project Manager can edit and print templates provided, on 8.5” x 11” or 11” x 17” signs. There is no cost to projects. Signs include project purpose and metrics (size, scale), schedule, and contact information for Project Manager.

Number
Minimum of one sign per construction site. Additional signs may be required if work within a building causes closings or detours.

LOCATION
Wall clings should be located on walls, doors, or glass at closures or adjacent to work areas. Sign shall be visible to university patrons.

Campbell - Classroom Renovation

PROJECT
• Renovation will include classrooms 213, 243 & 251

BENEFIT
• Updated energy efficient LED lighting
• Technology upgrades for enhanced instruction
• New furniture and finishes will improve the student experience

TIMELINE
• May 2015 - August 2015

Facilities Operations and Development
614-292-4458 • go43210.osu.edu
Project # OSU-J120000

THE OHIO STATE UNIVERSITY | UNIVERSITY SIGNAGE STANDARDS

ISSUED 7/1/2014 | REVISED 1/7/2022

205
TEMPORARY SIGNS
TM-6 - Temporary Advertisements

FUNCTION
Posting of temporary signs, posters, banners, sidewalk wraps, H-Frames, A-Frames, and flyers on campus is limited to recognized student organizations registered through Student Life, Ohio State departments, faculty & staff members, and any Ohio State registered student.

LOCATION
Posting temporary signage is limited ONLY to designed open posting boards (inside) and kiosks (outside). Posting is strictly prohibited in or on the following:
- ad dispensers
- bathrooms
- benches
- borders and frames of posting boards or kiosks
- brick
- bus stops
- campus signage
- columns
- concrete
- construction signs
- doors
- emergency call phones
- fixtures
- glass
- light poles
- mailboxes
- newsstands painted surfaces
- picnic tables
- pilings
- private property
- railings
- seating
- seating walls
- sidewalks
- staircases
- traffic signs
- trash cans
- trees
- utility boxes
- vegetation
- vehicles
- walls (interior & exterior)
- windows
- wood surfaces

VIOLATIONS
Violations constitute grounds for removal of the material by Facilities Operations and Development, which reserves the right to charge for the cost of removal and any associated repairs. A minimal charge for any cleaning will be $57 for each separate location.

NOT PERMITTED
- Commercial interest informational.
- Non-university event related information.
- Third party advertising
- Temporary signage may not be used for commercial advertising or promoting any political candidate, parties on issues, or identifying, advertising or promoting any religion.

NOTE: See TM-3 for Banner Submittal Requirements
TEMPORARY SIGNS

TM-7 - Chalking

FUNCTION
Chalking on campus is limited to recognized student organizations, Ohio State departments, faculty members, staff members, and any Ohio State registered student.

CONTENT
The material used to mark the walk must be water-soluble chalk (sidewalk chalk).

LOCATION
• Chalking is permitted only in open areas that can be directly washed by rain. The chalking must be on a horizontal surface not covered by an overhang.
• Chalking is prohibited on all vertical surfaces, buildings, walls, benches, picnic tables, signs, poles, newsstands, columns, bus stops, mailboxes, light poles, emergency call phones, trees, or vegetation.

VIOLATIONS
Violations constitute grounds for removal of the material by Facilities Operations and Development, which reserves the right to charge for the cost of removal and any associated repairs. A minimal charge for any cleaning will be $57 for each separate location.

NOT PERMITTED
The use of markers, paints, oil-based products, or sprayable chalk is prohibited.
